Staying Healthy

How do you stay healthy? There are lots of different ways. The easiest way to stay healthy is to do exercise. Exercise is moving your body, for example, by doing sports. Another way to stay healthy is to take care of the food you eat. This is called a diet. But some people find it difficult to eat healthily all the time.

We asked two groups of school students about how they stay healthy. The first group was from the USA, and the second group was from Japan. The choices were exercise (like sports clubs or going to the gym), and healthy diet. There were choices for people who both exercised and ate healthily, and also a choice for people who did neither. Students only gave one answer.

Comment from Naomi, age 16

Ugh! I hate sports and exercise. I'm so bad at them. I can't run fast, or catch balls, or even swim. I get so tired when I do these things. I don't think I need to join any sports clubs. In Japan, we all have to do PE every year of high school. I think this is enough exercise for me. I never want to do exercise in my free time! Anyway, I think I'm healthy, even though I don't like sports. My family makes sure I eat lots of vegetables and I don't eat fast food. Sometimes it's expensive, but we think a healthy diet is important.

Product Review: CoolFan 2023 Neck Fan

The CoolFan 2023 is the same great neck fan with an all-new design. Whether you're dressed for work, exercising or just relaxing at home, this modern design will suit your needs. You can choose between 3 wind speeds: low, medium, and high. Simply press the button once to change the wind speed.

The CoolFan 2023 also has *a long-lasting battery that can be used for as long as 9 hours on a full charge, so you can stay cool all day. It uses USB Type-C to recharge, so you can charge it just like any other device.

Good bye Sweat! ★★★★★ — Johnny Dumpson

I love how convenient and easy to carry this fan is. The fan speed has 3 settings. Unlike a handheld fan, I simply wear it around my neck so my hands are free. I use it on my 45-minute journey to and from work every day and there's still power left when I get home. I charge it every night using a USB-C charger. It's also simple and fashionable, so I don't have to worry about how it looks with my work clothes on.

Don't waste your money. ★ — Ken Kodawari

It only works inside when there is cold air. When I use it outside in the humid summer heat, it just *blows hot air onto my face. I wish it could spray mist.

The design isn't great for women or those with shoulder-length hair or longer. My hair sometimes gets caught in the holes at the back. It doesn't cause the fan to get stuck, but gives me a strange feeling at the back of my neck. I'm worried that it's breaking my hair. It's also a little heavy.

In short, it's not a good buy. I think getting a frozen ice ring might be a better choice for the middle of summer.

A for fashion! B for *functionality. ★★★★★ — Grace Glamorton

I feel like I'm from the future when I wear this! I love the way it looks. The gray and white color makes it look very modern. You can bend its arms so it won't break easily even if the kids play with it. A small problem is that it's not small enough, so I can't put it in my handbag easily. I need to wear a bigger bag when I go out with this.

About how it works, it's average. At first, it cooled me down well but as the temperatures rose in summer, it became less and less effective. When the temperature reaches to about 35°C or higher, it doesn't cool me down at all. Maybe if you live in a cooler or less humid country this won't be a problem for you.

I tend to *focus on fashion over functionality, so I thought the price was okay thinking about how cool the design is. Of course, I wish it could cool me down at higher temperatures, but at that point I would probably be inside with an air conditioner anyway!

*long-lasting 長持ちする

*blow ～を吹く

*functionality 機能性

*focus on ～に集中する

Should Schools Use Video Games for Learning?

<Part 1>

Do you love video games? Playing video games is a very popular hobby at home among children and adults. Nowadays, we live in a world of technology and some people think, “Why not use video games in class, too?” For many years, teachers have been thinking about whether or not to use them in class. Should video games be used in learning at schools?

<Part 2>

YES

Ellen, from Australia

As a student, I think video games should be used in schools. Video games are fun, right? They can make learning exciting, too. When we play games, we learn without even knowing it. Moreover, video games can teach us important things like problem-solving and teamwork. Traditional ways of teaching on the other hand, often used textbooks which can be boring to some students. However, by using educational video games, students can actively take part in the learning process and they can make learning super interesting. Imagine learning about history by playing a game — you’re a detective solving mysteries in the past. How cool is that? Although some people worry about the use of video games in schools for learning, I believe that when used correctly in class, video games can be good for us.

<Part 3>

NO

Meiling, from China

Video games in schools? No way! I think we need to focus on books and real learning. Schools are places for focused learning and using video games in the classrooms may make students focus on the games rather than their studies. Yes, video games can be fun for students, but some teachers who tried games in their classes have said that the games created too much excitement and they were not really making the students interested in learning their subjects. Another reason is that students may continue playing them, and we may end up playing more than studying. Also, video games may make students not pay attention, too. Imagine if you're playing a game when you should be listening to the teacher.

Some games may be helpful in the learning process, but I believe not all video games can be useful for teaching some subjects and schools should be a place for serious education, not for fun and enjoyment.

Questions

(1) Why do some people want to use video games in school?

- ア They are easy to buy.
- イ They make learning fun.
- ウ They are popular in Australia.
- エ All students like video games.

(2) According to Ellen, what can video games teach us?

- ア How to be a teacher.
- イ How to read books faster.
- ウ How to make video games.
- エ How to solve problems and to improve teamwork.

(3) What is Ellen's main opinion?

- ア She thinks video games should be used in class.
- イ She thinks video games have a negative effect on students.
- ウ She thinks the old-fashioned teaching style is good for students.
- エ She thinks teachers should teach how to use video games correctly.

(4) Why does Meiling think video games are not good for school?

- ア They are too expensive.
- イ They make students bored.
- ウ Teachers may use them too much.
- エ Students might play them too much.

(5) According to Meiling, how do some teachers feel about using video games in class?

ア They make students too excited.

イ They help students study harder.

ウ They help students listen to the teacher.

エ They make students interested in learning.

(6) Some people say that parents should make a rule for children not to spend too much time playing games. Do you think it is good for them? Give one reason to support your idea.
